

Christien Andersen, 2020

The prints on the swimsuits are taken from the explanatory chalkboard diagrams that were performed by R.Stainer during his lectures about life before birth, karma, healing, etc which were also drawn partly in an *unaware* way.

This series of swimsuits is part of the artist's several 'collections' where she adopts the language of fashion.

These collections usually are composed of unique wearable pieces that function as collectible art-works.

The frenetic border hopping between industries such as medicine, psychology, fashion or contemporary art is present in much of her work.
